Recording Mode

There are three recording modes available on the voice logger system for you to select : Voltage, Audio and manual recording. Voltage control: This records the line according to voltage change, e.g. begins when telephone handset is lifted and then ends when the handset is replaced. Audio voice control: This recording mode is selected when connected to any digital or voip telephones utilising Maxtel'sDigital Adapter.

Automatic or Manual Recording:

The Maxtel Voice logger gives you the convenient option of automatically recording incoming and outgoing calls. You also can select the manual option to selectively record the conversations at the click of a button.

Technical Parameter

1. **Input: 1-16 channels**
2. **Impedance: high impedance >100K ohm**
3. **Signal-to-Noise: 50dB**
4. **Frequency response: 300Hz to 3400Hz**
5. **Digital mode:GSM**
6. **Collection speed: 12.5Kbit / 1s, compression ratio is 5**
7. **Average search path: 39MS**
8. **Power waste: 300W MAX**
9. **Celsius: +5 to +40**
10. **Humidity: 5% to 85%**
